Z-CERT Academy

From basic protection to appropriate cyber resilience

Your organisation uses CSIRT services. Through these CSIRT services, we support your organisation during incidents, monitor and scan the external perimeter of your network, and provide you with up-to-date threat intelligence. Would you also like to further strengthen your organisation's cyber resilience? The Z-CERT Academy offers targeted opportunities to help you achieve this.

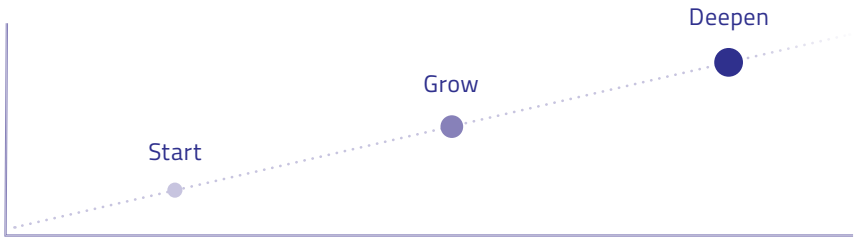

About Z-CERT Academy

Why the Academy?

The Z-CERT Academy transforms the knowledge and experience that Z-CERT acquires every day through incident response, threat analysis and research into practical support for healthcare organisations. This gives you access not only to knowledge, but also to concrete tools, guidance and exercises that can be applied directly within your organisation.

With the Z-CERT Academy, you can build your cyber resilience step by step, in a way that aligns with your organisation's level of maturity and ambitions. The Academy helps your organisation become stronger by developing knowledge and insight, establishing effective processes, and enhancing skills through training and realistic exercises.

Growing Cyber Resilience

The Z-CERT Academy combines knowledge, practical tools, guidance and exercises within one integrated programme. This enables your organisation to work more quickly and effectively towards an appropriate level of cyber resilience, without having to develop all the necessary materials, processes and training programmes itself.

Whether you are just getting started, looking to advance, or seeking deeper expertise in cyber resilience, the Academy offers a comprehensive range of resources covering a variety of relevant topics:

- **Threat intelligence and awareness**

  Threat assessments, analyses and factsheets that help you better understand and prioritise risks.

- **Protection and prevention**

  Practical guidance, white papers and measures designed to reduce vulnerabilities.

- **Detection and response**

  Playbooks, guidelines and incident response plans to help you respond quickly and effectively.

- **Training and preparedness**

  Realistic scenarios and exercises that enable teams to gain experience before an incident occurs.

- **Governance and compliance**

  Support with **NEN 7510** and the **Cyber Security Act**, providing insights and practical guidance for boards and management teams to help shape and direct cybersecurity strategy.

About Z-CERT Academy, continued

What's included?

- Webinars and live events
- In-depth publications and formats
- Community
- A dedicated business consultant as your point of contact

The Z-CERT Academy offers individual publications, as well as a coherent and immediately applicable approach. You don't have to reinvent the wheel: you'll receive practical guidance to take steps today towards achieving an appropriate level of cyber resilience.

Investment

Participation in the Z-CERT Academy costs €2,500 per year (excl. VAT).
In return, your organisation will gain access to:

- All Z-CERT webinars and live events
- Publications, resources and guidance documents
- The Academy community
- A dedicated business consultant as your point of contact

Additional options

For organisations requiring further in-depth training or specific guidance, additional Academy+ services are available on-site, such as tabletop exercises in a small-group setting, in-company workshops and technical (HART) testing on-site.

Is the Z-CERT Academy something for your organisation?

Please contact us at info@z-cert.nl for more information or a no-obligation chat.
